Dear Mr. Ryan:

RE: June 24, 1985, Letter from Don Ryan

The Air Quality Bureau reviewed the results of the fluoride analysis performed by Boyce Thompson Institute and has withdrawn citation 85-506-BR-2. The Bureau considers the fluoride in forage concentrations for October of 1984 to be in compliance with Montana ambient standards.

The Bureau will include this letter in our files and denote on the citation that it was withdrawn. If you have any further concerns, please let us know.

Sincerely,

Bob Raisch
